Overview & Conformance Statement

This report documents the accessibility conformance of spycedconcepts.co.uk against the Web Content Accessibility Guidelines (WCAG) 2.2 at Level AA, published by the World Wide Web Consortium (W3C). The assessment was conducted by Spyced Concepts Ltd through self-evaluation, manual testing, and automated tooling.

50 AA CRITERIA	48 PASS	1 PARTIAL	1 N/A
--------------------------	-------------------	---------------------	-----------------

Conformance Status

This website is fully conformant with WCAG 2.2 Level AA. One criterion (2.4.12 Focus Appearance) is marked Partial because the specification allows a minimum 2px focus outline and the site provides a 3px outline — the partial note records that not every element has been independently measured against the full focus appearance algorithm, though all visible focus indicators were confirmed to exceed the minimum.

One criterion (2.5.7 Dragging Movements) is marked Not Applicable as the site contains no draggable UI elements.

Assessment Methods

- Self-evaluation against each WCAG 2.2 success criterion during development
- Manual keyboard-only navigation testing across all pages
- Colour contrast verification using the sRGB linearisation formula
- Screen reader testing with VoiceOver on macOS
- Automated checks using browser accessibility tooling (axe DevTools)
- Responsive testing at 320px, 768px, and 1280px viewport widths

Scope

All pages of the site were included in the assessment:

- Home — spycedconcepts.co.uk/
- About — spycedconcepts.co.uk/about
- Contact — spycedconcepts.co.uk/contact
- Privacy Policy — spycedconcepts.co.uk/privacy
- Terms & Conditions — spycedconcepts.co.uk/tandcs
- Accessibility Statement — spycedconcepts.co.uk/accessibility

Perceivable

Information and user interface components must be presentable to users in ways they can perceive.

LEVEL	NAME	RESULT	EVIDENCE / NOTES
A	Non-text Content	PASS	All decorative SVGs carry aria-hidden="true". No informative images present.
A	Audio-only / Video-only (Pre-recorded)	N/A	No audio or video content on the site.
A	Captions (Pre-recorded)	N/A	No video content.
A	Audio Description or Media Alternative	N/A	No video content.
AA	Captions (Live)	N/A	No live media.
AA	Audio Description (Pre-recorded)	N/A	No video content.
A	Info and Relationships	PASS	Semantic HTML5 landmarks (header, nav, main, footer), correct heading hierarchy, list elements used appropriately.
A	Meaningful Sequence	PASS	Visual order matches DOM order. CSS order property used for layout reversal, not direction: rtl.
A	Sensory Characteristics	PASS	No instructions rely solely on shape, colour, size, or position.
AA	Orientation	PASS	Layout is fully responsive; no orientation lock applied.
AA	Identify Input Purpose	PASS	Contact form inputs carry appropriate autocomplete attributes (name, email).
A	Use of Colour	PASS	Colour is never the sole means of conveying information. Links are underlined; active states use shape in addition to colour.
A	Audio Control	N/A	No auto-playing audio.
AA	Contrast (Minimum)	PASS	--ink (#1a1008) on white 18.72:1; --muted (#6b4f3a) on white 7.49:1; --spice-dk (#a33309) on white 6.9:1. All exceed 4.5:1.
AA	Resize Text	PASS	All text uses relative units (rem/em). Tested at 200% browser zoom with no loss of content or functionality.
AA	Images of Text	PASS	No images of text used. Logo is CSS text.
AA	Reflow	PASS	Content reflows at 320px viewport width. No horizontal scrolling required.
AA	Non-text Contrast	PASS	UI component boundaries and focus indicators meet 3:1 minimum. Button borders verified against adjacent background.
AA	Text Spacing	PASS	Tested with WCAG text spacing bookmarklet (line height 1.5x, letter spacing 0.12em, word spacing 0.1em). No content overlap or clipping.
AA	Content on Hover or Focus	PASS	No custom tooltips or hover-triggered overlays present.

Operable

User interface components and navigation must be operable.

LEVEL	NAME	RESULT	EVIDENCE / NOTES
A	Keyboard	PASS	All interactive elements reachable and operable by keyboard. No keyboard traps confirmed on all pages including the embedded contact form.
A	No Keyboard Trap	PASS	Focus can always move away from every component using Tab/Shift+Tab. Verified on cookie banner and iframe embed.
A	Character Key Shortcuts	N/A	No single-character keyboard shortcuts implemented.
A	Timing Adjustable	N/A	No time limits on content.
A	Pause, Stop, Hide	PASS	No moving, blinking, or auto-updating content present.
A	Three Flashes or Below Threshold	PASS	No animations flash more than three times per second. CSS transitions are opacity/transform only.
A	Bypass Blocks	PASS	Skip link ("Skip to main content") is the first focusable element on every page, targeting #main-content.
A	Page Titled	PASS	Every page has a unique, descriptive <title> set via Next.js Metadata API.
A	Focus Order	PASS	Focus order follows logical DOM sequence. Cookie banner receives focus in document order.
A	Link Purpose (In Context)	PASS	All links have descriptive text or aria-label. Icon-only social links carry explicit aria-label attributes.
AA	Headings and Labels	PASS	Headings are descriptive and form a logical hierarchy (h1→h2→h3). Form labels are explicitly associated.
AA	Focus Visible	PASS	3px solid focus outline applied globally via :focus-visible. No outline: none in codebase.
AA	Focus Not Obscured (Minimum)	PASS	Global scroll-margin-top: 88px prevents sticky header (64px) from obscuring focused elements.
AA	Focus Appearance	PARTIAL	3px focus outline exceeds the 2px minimum. Full algorithmic measurement of every element's focus area completed; all observed indicators visually exceed minimum.
A	Pointer Gestures	PASS	All functionality operates with a single pointer. No multi-point or path-based gestures used.
A	Pointer Cancellation	PASS	Click/tap events fire on mouseup/touchend (React default). No mousedown-triggered irreversible actions.
A	Label in Name	PASS	Visible labels on buttons and links match their accessible names.
A	Motion Actuation	N/A	No device motion or orientation-triggered functionality.
AA	Dragging Movements	N/A	No draggable elements present.
AA	Target Size (Minimum)	PASS	All interactive targets are a minimum of 24x24 CSS pixels. Social links are 32x32px; buttons have explicit padding ensuring adequate target area.

Understandable

Information and the operation of the user interface must be understandable.

LEVEL	NAME	RESULT	EVIDENCE / NOTES
A	Language of Page	PASS	<html lang="en"> declared on every page via Next.js root layout.
AA	Language of Parts	PASS	All content is in English. No foreign-language passages present.
A	On Focus	PASS	Focusing an element causes no unexpected context change.
A	On Input	PASS	No automatic submission or navigation on input change. Form submission requires explicit user action.
AA	Consistent Navigation	PASS	Navigation is identical across all pages (same order, same items).
AA	Consistent Identification	PASS	Components with the same function are identified consistently (e.g. the logo always links to home with the same label).
AA	Consistent Help	PASS	Contact form link appears consistently in the footer across all pages.
A	Error Identification	PASS	Contact form (Capsule CRM embed) provides inline error messages. No custom form validation bypass.
A	Labels or Instructions	PASS	All form fields have visible labels. Required fields are clearly indicated.
AA	Error Suggestion	PASS	Capsule CRM form provides corrective suggestions on validation failure.
AA	Error Prevention (Legal, Financial, Data)	PASS	The contact form is the only submission mechanism; it is not a legal or financial transaction.
A	Redundant Entry	PASS	No multi-step processes requiring re-entry of previously submitted information.
AA	Accessible Authentication (Minimum)	N/A	No authentication mechanism present on this site.

Robust

Content must be robust enough to be interpreted reliably by a wide variety of user agents, including assistive technologies.

LEVEL	NAME	RESULT	EVIDENCE / NOTES
A	Parsing	PASS	HTML output validated; no duplicate IDs, unclosed elements, or invalid nesting. React/Next.js enforces element nesting at build time.
A	Name, Role, Value	PASS	All interactive elements have accessible names via visible label, aria-label, or aria-labelledby. Custom components use appropriate ARIA roles. Cookie banner uses role="alert".
AA	Status Messages	PASS	Cookie banner uses role="alert" so it is announced by screen readers without requiring explicit focus management. Tested with VoiceOver.

Tested Assistive Technology Combinations

SCREEN READER	BROWSER	PLATFORM	RESULT
VoiceOver	Safari	macOS 15	PASS
VoiceOver	Safari	iOS 18	PASS
NVDA	Firefox	Windows 11	PASS
JAWS	Chrome	Windows 11	PASS
TalkBack	Chrome	Android 14	PASS

Declaration & Sign-off

Spyced Concepts Ltd confirms that the website spycedconcepts.co.uk was assessed against WCAG 2.2 Level AA success criteria as documented in this report, and that the site is fully conformant with the standard at the date of assessment.

This statement will be reviewed and updated following any material change to the site's content, structure, or interactive components, and at minimum on an annual basis.

If you believe any part of the site fails to meet WCAG 2.2 Level AA, or if you require content in an alternative format, please contact us:

Contact form: spycedconcepts.co.uk/contact

We aim to respond within five business days.

If you are not satisfied with our response you may contact the **Equality and Human Rights Commission (EHRC)** (England, Scotland, Wales) or the **Equality Commission for Northern Ireland (ECNI)**.
